Scroll through the Compass. You will find out many fascinating facts about Russia...

1. How many time zones are there in this huge country?

2. What are steepes?

3. What is a taiga?

4. What does tudra mean?

Dear Colleague,

For years my husband and I have been friends with the wonderful people of Borok, Russia. We have visited the village and have enjoyed hosting the people of Borok at our home. It was a pleasure to run a student exchange program where several schoolchildren and their teachers visited Virginia for two weeks. I am excited to bring you this mission that highlights this area of Russia. I visited several villages and talked to numerous scientists in doing background research for this adventure.

I was particularly amazed with the art work of the children. Because there are not many art materials available for these students, they show incredible ingenuity by using pinecones, birch bark, old tin cans, and matchboxes, etc. to create wonderful art.

You may wonder if parts of the cartoon are true. In a small science museum in Borok, I found a jar containing a tarantula. The old scientist there (who had an abacus on his desk!) told me the story of the tarantulas of Green Island. I talked with old women who lost their villages and homes when the Volga was flooded and dammed in 1947. I saw the rooftops sticking out of the water. Each year the people of the area have Remembrance voyages to recall the old days of "Deep Russia!"

I hope you and your students enjoy this mission and will learn more about this amazing country.

Kathy

Answers:

Video Camera

1. natural materials from the forest
2. It was dammed and flooded
3. Mother Russia
4. singing folk songs
5. They were covered by water.
6. a board from her door
7. Beluga Sturgeon
8. They can get together with scientists from all parts of the world and share information.

BONUS – Birch trees

Field Guide

1. pine cones and pine needles
2. 2
3. smell

Experiments and Recipes

1. 4
2. white bread, paper towel, plastic bag

Radio

1. Hysi's Millstone
2. Wee Little Havroshechka

Compass

1. 11
2. flat, treeless grasslands
3. huge forest with coniferous trees
4. cold desert
